PYXIS // BRAND GUIDELINES

The blueprint browser.

A local-first browser for Windows — no account, no sync, no telemetry.

01 — LOGO

The mark is the ember flame in a square plate. Use it at 16–96px; below 16px it loses legibility. Never stretch, recolor, add shadows or place it on clashing imagery.

PRIMARY 96px

UI 32px

FAVICON 16px

02 — COLOR

One warm accent over cool neutral surfaces. Ember is signal only — warnings, active states, focus rings, brand marks. Saturation stays under 80%; no second accent ever.

Blueprint Black
#0B0D10
Canvas, the drafting table

Raised Drawing
#14181D
Cards, popups, toasts

Rule Hairline
#232932
1px borders, grid rules

Ink Line
#E4E7EA
Primary text, drawn lines

Draft Gray
#8B95A0
Secondary text, metadata

Ghost Gray
#5E6875
Micro-labels, disabled

Signal Ember
#E0703A
The single accent

Ember Dim
#E0703A @14%
Accent washes, chips

03 — TYPOGRAPHY

Interface voice is quiet sans; metadata speaks mono. Uppercase micro-labels with wide tracking are the signature.

DISPLAY — SEGOE UI VARIABLE, −2 TO −3.5PX TRACKING

Browse without being watched.

MONO — JETBRAINS MONO, +0.18EM TRACKING, UPPERCASE

CTRL+SHIFT+Z · EASYLIST ENGINE · 0 TELEMETRY

04 — LAYOUT

Structure is drawn, not painted: hairline rule grid (28px), square corners (0 radius), 1px `Rule Hairline` borders instead of shadows. Square is the brand.

DO

Hairline grids · square corners · mono micro-labels · single accent · flat elevation

DON'T

Rounded corners · drop shadows · gradients · second accent · serif or Inter · emojis

05 — VOICE

Cold, precise, honest. State what the software does and what it doesn't — including its edges. No marketing verbs (elevate, unleash, seamless), no emojis, no hype.

SOUNDS LIKE

"0 telemetry." · "Your data never leaves the disk." · "Known edges: Google search still sees queries."

NEVER

"The next-gen browsing experience" · "Elevate your workflow" · emoji bullets
